for a Better Tomorrow.”

CHILD RESISTANT CAP

Child resistant caps, also known as child resistant packaging or CR packaging, are specially designed closures for containers that make it difficult for children to open while remaining accessible to adults. These caps are primarily used on products that contain potentially harmful substances, such as medications, household chemicals, and pesticides.

NORMAL CHILD RESISTANT CAPS

Available SIZE (mm)

TAMPER EVIDENT CRC

Tamper-evident child-resistant caps provide an extra layer of security for products that need to be protected from both accidental child access and tampering. These caps combine the child-resistant mechanism, which requires a specific sequence of actions to open, with a tamper-evident feature that indicates if the cap has been opened or disturbed.

We offer a complete range of embossed and debossed CERTIFIED child-resistant closures, crafted with precision and attention to detail. These design options not only enhance product aesthetics but also help strengthen brand identity through clear, durable, and visually appealing markings.

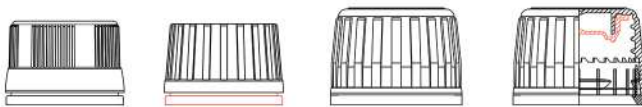

TAMPER EVIDENT CAPS

Pilfer-proof caps, also known as tamper-evident caps or seals, are designed to provide visible evidence of tampering or opening. They are used to ensure the safety and integrity of products, particularly in industries like pharmaceuticals, food and beverages, cosmetics, and chemicals.

NORMAL SCREW CAPS RIBBED TYPE

When it comes to storage and offering the best of packaging in containers, Our Screw Caps are apt in offering leak proof and spill proof induction sealing solutions. The utmost feature fact is the perfect weight and tight closure of the bottles. Our closures guarantee slip free fitment on standard bottle neck.

CRC DROPPERS SET

Our design experts have developed these unique Child Resistant Dropper Sets for various bottle neck sizes. CRC droppers are commonly used on bottles containing:

- Medications
- Essential oils
- E-liquids
- Laboratory chemicals
- Other hazardous substances

APPLICATORS

We are manufacturing a wide range of applicators namely Tablet Applicators , Gel Applicators and Piles Applicators.

Custom-Engineered Applicators for the Pharmaceutical and Consumer Healthcare Sectors. Our complete range of custom medical applicators are a safe, sanitary, and cost-effective solution for wholesale customers throughout the healthcare industry.

INFRASTRUCTURE

PRODUCTION AREA

With a rigorously maintained classified production area, we ensure contamination-free manufacturing and reliable, high-quality packaging solutions.

QC TESTING LAB

Our dedicated QA testing lab is equipped with modern instrumentation to validate quality, enhance reliability, and meet stringent regulatory requirements.

SORTING AREA

With a rigorously maintained classified production area, we ensure contamination-free manufacturing and reliable, high-quality packaging solutions.

FACILITY

With upgraded clean-room partitions and PUFF panels, our facility delivers enhanced contamination control and consistent manufacturing excellence.

DISPATCH AREA

With a well-structured dispatch area, we guarantee safe storage, quick turnaround, and hassle-free dispatch processes.

ASSEMBLY MACHINE AREA

Our facility features a dedicated, controlled assembly section with versatile machines designed to assemble a wide range of components from CRCs to droppers and syringes with reliability and precision.

CERTIFICATIONS

With recognized certifications including USDMF, GMP, and ISO, we meet stringent global quality benchmarks for pharmaceutical primary packaging.

TEAM

A brilliant team of experts drives our operations, ensuring precision, reliability, and continuous improvement.

STAFF

With dedicated professionals leading every department, we maintain excellence, accountability, and smooth workflow at all levels.

Our value proposition is built on ensuring your packaging not only meets but **exceeds stringent regulatory requirements**, significantly de-risking your supply chain through credentials like the **US Drug Master File (DMF) Type III**. We focus on critical safety components:

- **Seamless Product Development & Tooling:** Leveraging our sister concern, **Right Angle Dies**, we offer end-to-end solutions, from in-house mold development and rapid prototyping to compliant, high-volume
- **Guaranteed Compliance:** We maintain **US Drug Master File (DMF) Type III status** for primary packaging, alongside full cGMP and ISO certification, ensuring flawless regulatory submission support.
- **Risk Reduction:** Implementing rigorous quality control processes to ensure consistency and minimize costly batch rejections of critical components.
- **Supply Chain Efficiency:** Offering reliable lead times and tailored inventory management to keep your production lines running smoothly.

ABOUT COMPANY

Right Angle Pharmapack has gained immense expertise in manufacturing Pharmaceutical Primary Packaging products such as Child Resistant Caps , Oral Suspension Syringes , Tamper Evident Caps , Eye Ear Dropper Bottle Sets , Dry Syrup Hdpe Bottles , Tamper Evident Child Resistant Caps , Measuring Cups , Normal Screw Caps and many more. We are equipped with high precision injection molding machines (Milacron make) and IBM (Victor make) to achieve excellent product quality and desired output within the targeted timeline. Also , to keep up with market needs and customer requirements, we have also engaged ourselves into product development by adding an In-House tool room facility for making molds especially for Caps , Closures , Bottles & Syringes. Our technical team is highly capable of troubleshooting the problems faced by customers on line trials & filling lines.
